

Decorative Overlay

Residential Flooring Solutions

Why Choose Residential Decorative Finishes?

The increasing trend toward decorative concrete floors offers a multitude of options in seamless, contemporary finishes. At Urban Concrete Floors, you can select from a unique range of handcrafted decorative epoxy, polyurethane blends, or cementitious overlays for a more modern and understated look. We offer, Polished Pewter, Pietra, Microcemento, Urban Murano and Stonehenge finishes.

Since 2011, we've been creating bespoke decorative overlays in homes, with our trained artisans specialising in this space. Your flooring finish serves as the focal point of your home décor, transforming your space and leaving a lasting impression. Each of our finishes are completely unique in each installation. We create our finishes on site, and hand-apply most finishes directly over substrates of concrete, timber, and even tiles to create a seamless look.

Polished Pewter

Our 'Polished Pewter' finish offers a luxe, polished concrete look with a unique blend of tinted epoxies, cementitious polymers, and polyurethane. Created through 16 meticulous processes by our artisans, it results in a translucent mix of warm and cool greys. This finish is seamless, slightly warmer than tiles, and can be applied over various surfaces, available in gloss or satin.

Microcemento

Discover the durability and elegance of our 'Microcemento' finish. Hand-trowelled to mimic natural stone, this 4-5mm thick overlay is strong, long-lasting, and perfect for both indoor and outdoor spaces. Add timeless charm to your space with Microcemento.

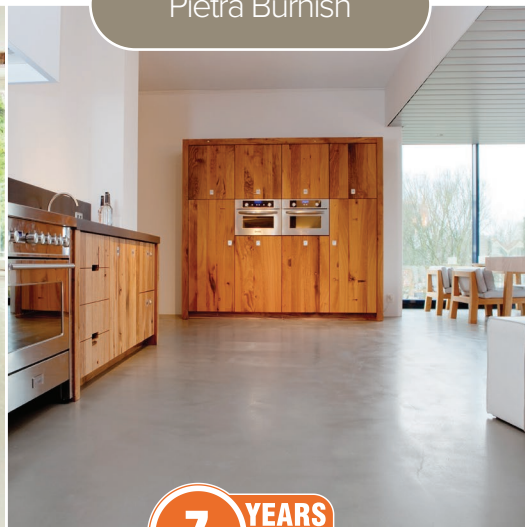

Pietra Burnish

The Pietra Burnish finish is a cement-based overlay that gives a stone-like look and feel. Applied by our skilled artisans, each floor is unique, with a modern, understated design in neutral colors. It's durable, customizable, and finished with a smooth satin sheen.
