Urban Industrial

Supafloor

Urban Industrial Supafloor is a high-performance resin flooring system designed for warehouses, factories, workshops and other demanding industrial environments.

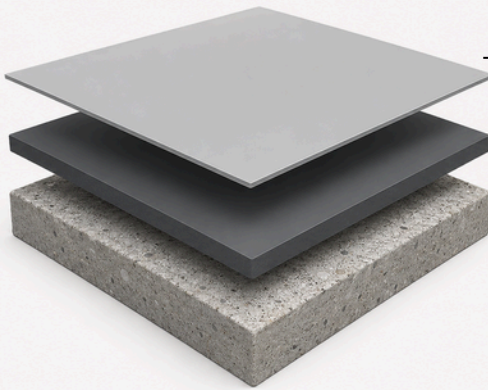

Engineered for durability and compliance, it offers excellent resistance to chemicals, abrasion and heavy traffic, while its seamless, impervious finish creates a hygienic, easy-to-maintain surface. Built for demanding use, Supafloor delivers a long-lasting flooring solution that helps reduce downtime, maintenance and repair costs.

Our Process

Our industrial flooring process is designed for durability, performance and efficiency. Every project begins with a detailed site assessment and professional surface preparation to ensure strong adhesion and a long-lasting finish.

Once prepared, our team applies the selected flooring system with precision and minimal disruption to operations. From epoxy coatings to heavy-duty seamless finishes, each surface is built to withstand daily traffic, impact and wear while delivering a clean, functional result.

2 URBAN INDUSTRIAL SUPAFLOOR

Self-smoothing epoxy wear layer
500-1000 microns.

1 HYCHEM PRIMER

Penetrating epoxy primer. Bonds
system to concrete substrate.

CONCRETE BASE

Prepared concrete substrate.
Ground and dust extracted.

Typical Applications

-  Gyms
-  Showrooms
-  Garage & Workshops
-  Carparks
-  Factories & Warehouses
-  Manufacturing Spaces
-  Hospitality (BOH & FOH)
-  Schools/Education Facilities
